

ORGAN PIPE CACTUS NATIONAL MONUMENT RUINS STABILIZATION WORKSHOP

January 4-8, 2011

Join the Drachman Institute of the University of Arizona, Cornerstones Community Partnerships, and the Vanishing Treasures Program of the National Park Service in a week-long (Tuesday-Saturday), hands-on field school in Organ Pipe Cactus National Monument in southern Arizona.

Work will include the stabilization and repair of a variety of vernacular structures in a range of materials.

- ☞ Adobe
- ☞ Mud Plaster
- ☞ Timber

An excellent opportunity to learn about preservation treatments in compliance with the Secretary of the Interior's Standards for Rehabilitation and the Guidelines for the Preservation and Maintenance of Vanishing Treasures Resources.

There is NO COST for the workshop. In addition, lodging, transportation, and meals will be provided for free to *student* participants (up to 8).

Please contact Allison Kennedy, Heritage Conservation Project Coordinator with the Drachman Institute for more information or to reserve your space.
