- Mortar repointing
- Masonry work: mixing mortar, hauling to "repointers"
- Organizing food/beverages
- Runner
- Mortar repointing/on scaffolding
- Tools: check in/out
- Porta-pottie patrol
- Other: _____

Cornerstones Community Partnerships, a non-profit organization based in Santa Fe, will be providing training and guidance on this project.

Cornerstones works in partnership with communities to restore historic structures using traditional building practices. The organization has a national reputation for creative use of historic preservation as a tool for community revitalization.

During the first week in September, Jake Barrow, Program Director for Cornerstones, will be training crew leaders for the Waterworks project. For the rest of the month, crew leaders will work with volunteers on masonry repair.

- Do you know the history of this 1887 building?
- Do you know what kind of rock it is made of?
- Would you like to learn how to mix and use traditional lime-based mortar, and how to repoint masonry?
- Did you know that lime is a “green” building material?

You or your organization can learn about the history of the Silver City Waterworks while helping with its preservation.

Come help us out – a week, a day or even a half-day!!

Loaned equipment and donations (e.g. food) are also appreciated.
